

SATURDAY, JUNE 11, 1859.

H. B. MASSER, Editor and Proprietor.

TO ADVERTISERS.—The circulation of the SUNBURY AMERICAN among the different towns on the Susquehanna is not exceeded, if equaled by any paper published in Northern Pennsylvania.

Democratic State Ticket, Nominated by the Convention of March 10.

For Auditor General, RICHARDSON L. WRIGHT, of Philadelphia. For Surveyor General, JOHN ROWE, of Franklin.

For District Attorney.—We have been requested to state that S. B. Boyer, Esq., of Sunbury, will be an independent candidate for District Attorney, at the next election.

We are requested to say that Henry B. Weaver of Trevorton, will be an Independent Candidate for County Commissioner at the ensuing election.

Our readers will observe that Dr. J. W. Peal has taken into partnership Dr. Dodge in the practice of their profession. Dr. Peal who has long been a practicing Physician in this place now divides his time between Sunbury and Trevorton.

The proprietors of the Iron Mountain, in Missouri, have succeeded in smelting the ore from the Mountain with the raw bituminous coal that is mined in the vicinity of St. Louis.

The editor after an absence of some six weeks from New York, has again returned to his post.

On Monday last a son of Mr. James Miller, aged about six years, while attempting to climb on some coal cars standing on the track, fell and broke his arm.

A little girl of Mr. Charles Beck, of this place, was badly bitten by a dog on Wednesday last. The girl was playing and accidentally threw something on the dog, when he bit her in the face and ear, inflicting a very severe wound.

Mr. Albert W. Fisher has put up in his Drug Store, in this place one Van Allen's new Soda Fountain, which works admirably. The soda water from these Fountains is not only refreshing and pleasant beverage, but entirely free from admixture of foreign ingredients to which mineral water is sometimes liable in the old fountains.

The editor of the American is agent for the sale of these Fountains, and has several now on hand. Price \$45.00.

FAST TIME FOR SCUMS.—A four years old, mare, called the "Whip-poor-will," formerly owned by Mr. Kerlin of Snyder county, and now the property of Sheriff Vanduyke of Sunbury, trotted over the course at this place on Tuesday last in 2 minutes 40 seconds, in a buggy with two men weighing 280 pounds. The horse "Sir John Roush," seven years old, also owned by Sheriff Vanduyke, carrying the same weight as above, went over the course in 2 minutes 55 seconds. They are both fine animals.

WEBSTER'S PICTORIAL DICTIONARY.—The publishers of Webster's Unabridged Dictionary have in press a new edition of that work, with fifteen hundred pictorial illustrations; several thousand new words added to the vocabulary; a table of synonyms by Prof. Goodrich, with various new features. It is to appear, we understand, at an early day, and will be looked for with much interest. We have seen specimen sheets of the pictorial illustrations. They are well executed, and will often be found useful in giving a much more correct idea of an object than can be obtained by a definition. A specimen of this valuable work can be seen at this office.

PATENT RAIL ROAD SWITCH.—We are pleased to learn that Mr. Jacob Youngman of this place, has obtained a patent for his new Railroad Switch. From a slight examination of this invention, we are favorably impressed with its usefulness and importance. We trust Mr. Youngman will reap a liberal reward for his ingenuity, and the time and trouble in perfecting his invention.

The firemen of this place intend to celebrate the coming Fourth by a parade.—The firemen from the neighboring towns have been invited, and no doubt a large number of them, with their machines, will be present.—The "Good Intent" will prepare a dinner upon the occasion. The dinner will be served on the green in Market Square.

SUNBURY AND ERIE RAIL ROAD.—At the letting of this road at Philadelphia, the remaining eighty nine miles, of the middle division extending from Sunbury to Warren was allotted to Messrs. Cartwright & Co. The route is by way of West Creek Ridge, way and Clarion River. Three fourths of the work is to be completed by the 1st of June next, and the remainder by July following.—It is now supposed that the whole road will be completed by November 1860.

BUTTER.—The price of this article has come down to sixteen cents per pound, in this place. This is still a big price as compared with former times. For several years past the price in this place have ranged from 20 to 25 cts. We recollect when at this season it was worth only eight cents and not desirable at that.

GEN. CAMERON.—A Convention of the People's party of Danbury county, was held in Harrisburg, on the 28th ult., at which resolutions were unanimously passed endorsing the Senatorial course of Hon. Simon Cameron, and nominating him as a candidate for the Presidency.

The Episcopal Convention of Ohio has elected the Reverend George T. Bedell assistant Bishop of that Diocese. Dr. Bedell is about forty years of age, and a son of the Rev. Dr. G. T. Bedell, who died while rector of St. Andrew's Church, Philadelphia, about a quarter of a century since.

DEATH LIGHTS.—On Sunday morning, May 26th, in New York, a young married woman, who had been nursing the restless babe through the night, rose at three o'clock in the morning for a light. While filling the lamp the burning fluid took fire—covered her dress—in short, after lingering in agony twelve hours, she died.

There is no paper says the Evening Bulletin which does not often contain accounts like the one above; no mail in which we do not read of them; yes, and there is no family in which champagne is used in which, in the long run, sooner or later, the disaster does not come. We can recall an instance in which we were triumphantly told "Well, we've used burning fluid these seven years and no accident yet." The only answer for such a remark is, "then you are all the nearer to one." For the fact is, wherever there is a chance of a calamity allowed to remain, dependent upon the simple safeguard of precaution, it is sure to come at some time. The lady who was murdered in New York by the diabolical two-penny saving invention, was, we doubt not, very careful indeed. But when one has been bewildered and wearied until three o'clock in the morning by a crying babe, or an invalid, and then attempts, while "tippy with sleep," to fill a fluid lamp, nothing is more likely than that mistake may occur.

And there is something so terribly life-like, so demoniacally mysterious in the action, not only of gunpowder and fire, but of these "fluids." Who has not been awed at seeing flames run, apparently like serpents endowed with intelligence, over surfaces which gave them no nutriment, for the purpose of destroying distant objects? Who has not trembled to see gunpowder apparently explode of itself, as if mad to fulfill its mission? So it is with all these destructive materials. It is a poor economy to light up a house with death fires and corpse candles. Think of this as you carry a champagne light around with you in lonely places at midnight!

AND STILL ANOTHER.—A shocking accident occurred a day or two ago to a young lady named Melville Sawyer, residing in Port Jervis. She was sitting up making her wedding dress, when finding that the fluid in the lamp was nearly consumed, she attempted to fill it with one of the wicks burning. No sooner did the light come in contact with the fluid than it burst the can, and setting fire to the young lady's dress, burned her so seriously that she expired in a short time.

We agree with our cotemporary of the Harrisburg Telegraph, who properly terms them "murderous implements," and says—"We have an average of at least one 'shocking accident' daily, as we term over our newspaper exchanges, from the same cause, 'bursting a fluid lamp,' and almost all fatal to life. There ought to be a State law, or a municipal ordinance in every State, city and town, in the Union, making it heavily severe to use one of these murderous implements."

CHANGE OF TIME.—A change of time in the running of the cars on the Northern Central took place on the 23d of May. We did not notice the change at the time except to correct it in our time table. The morning or mail train South, arrives here now at 10.50. The Niagara Express 11.35 P. M. The Burden and Passenger 6.30 P. M. Going North the mail train arrives at 3.16 P. M. Niagara Express 10.15. Burden and Passenger 6.30 A. M.

The Post Office Department, in order to ascertain the exact amount which would accrue to the revenues of the General Post Office if the matter now transmitted through the mails free were paid for, has prepared a circular directing postmasters to keep a daily account of the additional revenue which would accrue to their respective post offices if postage was paid upon the letters, &c., now transmitted free through the mails; these accounts are to commence on the 1st of July, and continue five quarters.

DESTRUCTION OF CATTLE.—We scarcely ever open our exchanges that our eye is not arrested by some account of the destruction of cattle on railroad tracks. The number killed in this manner is truly frightful. It seems that a certain number of these animals must be killed on every railroad before their owners will properly secure them. It would be well for farmers and others to recollect that they are liable in very heavy damages for any accidents that may befall a train on account of their cattle being on the track.

AN ITEM FOR TAVEN KEEPERS.—Judge Maynard (says the Pittsburg Chronicle), in charging the jury in the McTernan case, stated that where a person sold a man liquor who was drunk, he was liable under the law prohibiting the sale of liquor to intemperate persons. If it was shown that the man was not an intemperate person, the party furnished him with the liquor was still amenable to law, if he knew he was drunk—even though he might have been intoxicated accidentally, and it was his first offense.

UTAH.—Recent accounts from Salt Lake City represent the people as being in an excited state, and it is highly probable that a collision will occur between the Mormons and the Government troops. Numbers of the saints have encamped themselves in the mountains, and being equipped for military duty, it is feared that they will give our troops some trouble.

A rope ferry has been started near Muncy Bridge, by D. Mecum. Mr. Mecum resides at the Railroad depot, and runs a hack to and from Muncy. Mr. Mecum says, that the Bridge Company charges him too much toll.

President Buchanan, accompanied by Mr. Thompson the Secretary of the Interior, is on a visit to North Carolina. At Weldon on Tuesday last, he was formerly received and welcomed by the Governor of the State and other public men.

PETERSON'S Counterfeit Detector for June has been received. Published at only 100 per annum, by T. B. Peterson & Bro. Every business man should become a subscriber at once.

THE PRINTER.—This is a monthly, published for the special use and benefit of Printers. It has reached its second volume and is published with credit by John Henry, New York, at one dollar.

COUNTY POSTMASTERS.—Postmasters over the county should make it an object to obtain subscribers for their own county papers, as they are allowed out of the post office 10¢ cents for every county paper received at their offices.

THE PRESIDENT AND GOV. PACKER.—The Washington correspondent of Forney's Press contains the following item of political gossip: I forgot to say to you that while General Bridges, of Lock Haven, Clinton county, of your State, was in this city protesting against the appointment of Mr. Quiggle as consul to Antwerp, he let out a fact which bears somewhat upon the future of Pennsylvania politics. He said that Buchanan, that the appointment alluded to was a most unfortunate one, the President responded by stating that he desired to be let alone—that he was now an old man, who would soon be out of office and forgotten; but that he, General Bridges, would render him, J. B., an essential service, by helping to crush the Governor Packer—a point which the President earnestly declared he and his friends had fully determined upon—and that Bridges started home resolved, after having had this program submitted to him, to take off his coat and assist in putting down your intemperate and high-spirited Governor. This, he will assuredly do, the fixed purpose of the Administration here. A number of small editors of small country papers in your State have been located in Washington, and are sending home weekly columns upon Gov. Packer, prepared by order of Judge Black and the President, while those who are connected with persons holding office in this city, in your State, and elsewhere, who own or control newspapers, are commanded to do the same thing on pain of ostracism.

DRUGS PATENT PIANO FORTE.—The great superiority of these beautiful instruments over the old style of Pianos, is so obvious that they must ere long supersede every other kind. They need only be seen and heard to be appreciated. We have just received one of these Pianos from Wm. Hall & Son New York, sole agents for the Patent. Having received an agency for their sale, we can furnish them at the manufacturers prices. The following will more fully describe their merits: THE NEW PIANO FORTE.—It is some five years since Mr. Driggs invented the new Piano, and it is now generally known as the "Wallace Piano-for-te," but it is only within the past few months that it has excited such universal admiration. Testimonials of its excellence in fitness of tone, fullness, power and capacity for giving expression, or what musicians call "giving to the instrument, or sustaining itself in sostenuto passages, have been furnished by Thalberg, Gottschalk, Strakosky, William H. Fry, Maretzek, and most of our eminent Piano-for-te players and musicians. In fact, it seems destined to inaugurate a new era in Piano-for-te playing, enabling the performer to develop the sympathetic powers of music, heretofore confined to instruments of the violin class. The principle of its construction is theoretically that of the violin, and the frame instead of being a mass of heavy blocks and bars, is a complete vibrating shell, with an upper and low sounding-board, extending over the whole instrument and connected by a sound post.

The iron bed-plate, which takes the whole strain, makes it impossible for it over to give out, and the frame instead of being a mass of heavy blocks and bars, is a complete vibrating shell, with an upper and low sounding-board, extending over the whole instrument and connected by a sound post.

The iron bed-plate, which takes the whole strain, makes it impossible for it over to give out, and the frame instead of being a mass of heavy blocks and bars, is a complete vibrating shell, with an upper and low sounding-board, extending over the whole instrument and connected by a sound post.

THE IRON BED-PLATE, which takes the whole strain, makes it impossible for it over to give out, and the frame instead of being a mass of heavy blocks and bars, is a complete vibrating shell, with an upper and low sounding-board, extending over the whole instrument and connected by a sound post.

THE IRON BED-PLATE, which takes the whole strain, makes it impossible for it over to give out, and the frame instead of being a mass of heavy blocks and bars, is a complete vibrating shell, with an upper and low sounding-board, extending over the whole instrument and connected by a sound post.

BUY IN WHEAT.—The St. Mary's Beacon says the rust has already made its appearance in the wheat in that vicinity, and notwithstanding the favorable state of the weather at present, its ravages are fearfully on the increase.

The Old School Presbyterian General Assembly, now in session at Indianapolis, comprise 2,458 members, 2,324 churches, and 250,000 church members. There are 149 Presbyteries who are entitled to send delegates to the General Assembly.

A NEW COUNTERFEIT.—The Philadelphia Evening Bulletin, 6th inst., says: "We were shown, this morning, a counterfeit five dollar note on the Bank of Commerce, at Erie." The note is elegantly executed and well calculated to deceive. The vignette in the center represents a lake steamer, and at the ends are portraits of Washington and Clay.

INFANT BORN WITH THE HEAD OF A CAT.—One of the strangest freaks we have known recorded, occurred in this neighborhood, last week, being the birth of a child with a well developed body, perfect in all its proportions and weighing two pounds, but with a remarkable malformation, precisely like the head of a cat. It lived but a moment after birth.—The facts are vouched for by the attending physician, one of the highest standing in the city, and cannot be doubted.—Laurence (Mass.) American.

A JURY OF ST. LOUIS, before whom a case of breach of promise of marriage has been trying, rendered a verdict for the plaintiff, and assessed the damages at \$100,000, the full amount claimed. The defendant, who is said to be very wealthy, is sixty years of age. The plaintiff, who has numbered only thirty winters, is painted in rose colors by the Western journals. An appeal will be taken, and a new trial will probably be ordered.

A letter in the Washington Star, dated Camp Floyd, Utah, May 20, says that the sixteen children who were saved from the massacre at Mr. Meadows, passed through the camp the day before, in charge of Mr. Forney, of the Indian Department. As some of the children are old enough to remember and give some account of the horrible massacre, there is hope that the perpetrators of it will yet be discovered and punished.

AN ACCOMPANIMENTS WIFE.—The Augusta (Ga.) Zephyrus relates the death of a man in that county under the most horrible circumstances. He was intoxicated, and told his wife he intended to kill himself. She secured the proposition, and aided him in getting a rope over a beam in the house, and in getting it around his neck. She then knocked the chair from under him, and he fell, breaking his neck. His wife immediately ran away and had not been apprehended.

We are informed that J. P. Hogue, Esq. of Watonow, while on his way to mill one day last week, had a board in his wagon to slip forward on to his horse, scaring them, and throwing him under the wagon wheel of which passed over his left eye dividing his eyeball, and cutting through the flesh on the lower part of the eye. The wound was called to dress the wound, and we are happy to learn he is doing well.—Miltonian.

SOCIETY.—What is society, after all, but a mixture of mister-ics and mis-er-ics.

Save Time and you save Money. Hence if you proceed on your arrival at Philadelphia to ZIEGLER & SMITH, (Wholesale Corner of SECOND & GREEN STREETS) you will have an opportunity of purchasing from a larger, better and cheaper stock of WHITE LEAD, ZINC, colored Paints and Window Glass of assorted sizes and qualities than can be found at any other store there.

Religious Notices. Divine service will be held every Sabbath in this Borough as follows: PRESBYTERIAN Church.—North-west corner of Broadway and Chestnut streets, Rev. J. D. BRADDOCK, Pastor. Divine service every Sabbath at 10 A. M. Prayer meeting on Thursday evening at 7 o'clock. Rev. G. W. WATSON, Pastor. Old School Presbyterian Church, at 3 o'clock, P. M., every Sabbath.

REFORMED Church.—North-west corner of River and Chestnut streets, Rev. J. W. BRADDOCK, Pastor. Divine service, alternately, every Sabbath at 10 A. M. and 7 P. M. Prayer meeting on Wednesday evening at 7 o'clock. Rev. G. W. WATSON, Pastor. Methodist Episcopal Church.—Dewey street west of E. 4th street, Rev. G. W. WATSON, Pastor. Divine service, alternately, every Sabbath at 10 A. M. and 7 P. M. Prayer meeting on Thursday evening at 7 o'clock.

BAPTIST Church.—Fawn street, between S. V. P. Railroad, Rev. J. H. HAY, Pastor. Divine service every Sabbath at 10 o'clock, P. M. Duane street, between S. V. P. Railroad and 7th street, Rev. G. W. WATSON, Pastor. Divine service, alternately, every Sabbath at 10 A. M. and 7 P. M. Prayer meeting on Thursday evening at 7 o'clock.

MARRIAGES.—On Thursday morning, May 26th, at the residence of the bride's father, by the Rev. O. S. Hall, of Danville Samuel Lewis, Engineer and Surveyor, of Pottsville, and Rosetta Miller, daughter of George Miller Esq., of Northumberland, Pa. On Wednesday, May 25th, at the residence of the bride's brother, in Mainsburg, Pa., by the Rev. James Ross, Mr. PAUL CROWTHER, of Sullivan county, and Miss MARGIE H. WITTE, formerly of Milton.

On the 7th inst., by the Rev. J. W. Steinmetz, Mr. JOHN KISS to Miss MARGARET HAAS, all of Upper Augusta township.

DEATHS.—On the 27th ult., SAMUEL WILKINSON, of Irish Valley, aged 35 years and 13 days. The deceased was highly esteemed in his neighborhood, and lived and died in the faith of the Gospel. In Lower Augusta township, on Tuesday last, very suddenly, JACOB ARNOLD, aged about 29 years.

The Northern Central Railway. Arrival and departure of Passenger Trains on and after May 25th, 1859, at Sunbury. GOING SOUTH. TRAINS: For Harrisburg & Baltimore, Leaves Sunbury, Mail Train, 10:25 A. M. For Harrisburg Express, 11:41 P. M. Burden and Passenger, Mayville, 4:30 P. M.

GOING NORTH. TRAINS: From Harrisburg & Balt., Arrive at Sunbury, Mail Train, 6:10 P. M. Burden and Passenger Express, 7:13 P. M. Burden and Passenger, from Mayville, 4:24 A. M.

GOING SOUTH. TRAINS: For Williamsport & Elmira, Leaves Sunbury, Mail Train, 10:25 A. M. For Harrisburg Express, 11:41 P. M. Burden and Passenger, 4:30 P. M.

GOING NORTH. TRAINS: From Elmira & Williamsport, Arrive at Sunbury, Mail Train, 6:10 P. M. Burden and Passenger Express, 7:13 P. M. Burden and Passenger, 4:24 A. M.

The Shamokin Valley and Pottsville Railroad. Passenger trains leave Shamokin, as follows: For Pottsville, 11:41 P. M. For Sunbury, 4:30 P. M. For Harrisburg, 11:41 P. M.

THE WONDERS OF THE AGE.—The steam engine and the electric telegraph have ceased to be the wonders of the age. Young America is vigorously pushing ahead in every department of science and art for the amelioration of mankind from the tolls and cares incident to life. Sewing by machinery is the most recent successful invention, as well as the most important one to enslave womanhood. It enables her to escape the drudgery of hand sewing, and gives her ample time to cultivate her own mind or those of her children.

But of all the machines that have ever been invented, command us to those of GROVER & BAKER'S which are the best in the market for family use.

Offices of exhibition and sale 495 Broadway, New York; 18 Summer street, Boston; and 720 Chestnut, Philadelphia.

Any of our readers afflicted with Scrofula or Scrofulous complaints, will do well to read the remarks in our advertising columns respecting it. But little of the nature of this disorder has been known by the people and the clear exposition of it there given, will prove a valuable assistance to all who have long admired the searching and able manner in which Dr. Ayer, treats every subject he touches; whatever has his attention at all, has a great deal of it, he masters what he undertakes, and no one who has a particle of feeling for his afflicted fellow man, can look with indifference upon his labors for the sick. Read what he says of Scrofula, and see in how few words and how clearly he tells us more than we have known of this insidious and fatal malady.—Sun. Philadelphia, Pa.

CURIOUS WINDFALL.—At a furniture auction, in New Orleans, a few days since, an old French blacksmith was knocked down to a dealer for a new trade. In unloading the old rattle-trap at his own shop, his attention was attracted by a peculiar jingling sound, which induced him to examine his purchase more narrowly, and on unscrupulous one of the legs, a curious old cavity was discovered, containing a long narrow bag filled with a considerable quantity of ancient gold and silver coins, amounting in value to about \$850. There seems to be no clue to this singular deposit, nor the early ownership of the instrument be traced. The lucky finder of the prize intends to devote himself hereafter to the purchase of second-hand pianos, but with better judgment be already sent to Philadelphia for a complete suit of fashionable clothing from the establishment of Rockwell & Wilson, 603 and 605 Chestnut street above Sixth.

GROVER & BAKER'S CELEBRATED FAMILY SEWING MACHINES. A New Style. Price \$50. 425 BROADWAY, NEW YORK. 720 CHESTNUT STREET, PHILADELPHIA.

These Machines sew from two spools, and form a seam of unequalled strength, beauty and elasticity, which will not rip, even if every fourth stitch be cut. They are unquestionably the best in market for family use.

SEND FOR CIRCULAR. H. B. MASSER, Agent, Sunbury, Northumberland county Pa. November 27, 1858.

FABRETT, HERRING & CO'S PATENT CHAMPION SAFE. LATE FIRE AT DEBUIQUE, IOWA. December 7, 1857.

Genl. I am requested by Mr. T. A. Chubb, of the place, to say to you that the safe of the 4th inst., about 3 o'clock, his store took fire, and the entire stock of goods, including the safe, was completely destroyed. It is a great loss, and I am sure you will sympathize with me in my regret. And well they may be called Champions, for during the whole configuration there was no movement of the safe, and it remained in its place, and still, upon opening it, the inside was found to be as good as new, and the contents were perfectly preserved. Yours truly, N. A. McCLURE.

Before, with HALS P. F. POWELL, PHOTODUPLICATIONS, and the greatest security of any safe in the world, and built for fire, &c. FABRETT, HERRING & CO. have removed from 31 Market Street, to 60 Chestnut St. (Jays's Hall) where the largest assortment of Safes in the world can be found.

FABRETT, HERRING & CO. 60 CHESTNUT STREET, PHILADELPHIA. March 15, 1859.—2m

Save Time and you save Money. Hence if you proceed on your arrival at Philadelphia to ZIEGLER & SMITH, (Wholesale Corner of SECOND & GREEN STREETS) you will have an opportunity of purchasing from a larger, better and cheaper stock of WHITE LEAD, ZINC, colored Paints and Window Glass of assorted sizes and qualities than can be found at any other store there.

Feb. 5, '59.—ly-wx
